

# FSC workshop 2022

Cross-sector programming

June 29 & 30, 2022

Laurent Gimenez, FSC Coordinator, [laurent.gimenez@wfp.org](mailto:laurent.gimenez@wfp.org)

Chirine Homsy, FSC co-coordinator, [chomsy@mercycorps.org](mailto:chomsy@mercycorps.org)

## Cross-sector programming

### Objectives:

- to improve quality/impact of the FS assistance provided to beneficiaries
- to strengthen *Do No Harm* in food security programming
- to facilitate monitoring of the action and reduce overlaps/double counting of beneficiaries between clusters
- to identify what has to be reported under HRP or SERRP
- to identify cross-sector programming indicators to measure the impact of the action

Examples of possible cross-sector programming : FS/Nutrition, FS/Protection, FS/Education)

## FS/Nutrition

- Nutrition sensitive agriculture
- Food assistance should reach the 2,100kcal/pers/day but also should provide nutritious elements => top up for nutritious food (fruits, vegetables, fish) on top of the standard food package
- Specific groups (elderly, children <5, PLW) may have specific nutrition needs that must be considered in the food assistance.

## FSC/Protection (part1)

Use the Protection risk vulnerability to select the most appropriate assistance to be provided to beneficiaries (agriculture/livelihoods...) => Do No Harm

### Protection Risks Analysis

$$\text{RISK} = \frac{\text{THREATS} \times \text{VULNERABILITIES}}{\text{CAPACITIES}}$$

This tool serves to illustrate that the protection risks faced by a given population is directly proportional to threats and to vulnerabilities, and inversely proportional to capacities.

# FSC/Protection (part2)

## Example of Protection Risks Analysis

Risk		Threats		Vulnerabilities
<ul style="list-style-type: none"> <li>• Lack of access to food</li> </ul>	=	<ul style="list-style-type: none"> <li>• Kidnapping</li> <li>• Death</li> <li>• Extortion</li> <li>• Sexual Exploitation</li> </ul>	X	<ul style="list-style-type: none"> <li>• Agrarian population unable to produce food</li> <li>• Lack of income generating opportunities and credit</li> <li>• Displaced</li> <li>• Unpredictable/ unsafe access to land</li> <li>• Risky <u>behaviours</u> to access food/ cash</li> </ul>
		<p><b>Capacities</b></p> <ul style="list-style-type: none"> <li>• Agricultural knowledge</li> <li>• Small business experience</li> <li>• Sense of community</li> <li>• Analyse own security environment</li> </ul>		

## FS/Education

- monitoring of school feeding intervention => not monitored by FSC
- school gardening => not monitored by FSC
- business/technical training dedicated to youth are registered by both FS and Education clusters => how to split?
